EDUCATION

Universitas Multimedia Nusantara — B.Sc. in Informatics, GPA : 3.48 *Aug 2024 – Present*
SMKN 4 Kota Tangerang — Software Engineering *Jun 2021 – Jul 2024*
Bootcamp : Digital Skola — Data Science Bootcamp (*Excellent Graduate*) *Jun 2025 – Oct 2025*

TECHNICAL SKILLS

Languages : Python, SQL (MySQL, PostgreSQL), JavaScript, TypeScript
Frontend : React, Next.js, Tailwind CSS, React Native (basic)
Backend & APIs : FastAPI, NestJS, Node.js, Express.js, REST, LLM/AI API integration (OpenAI, Anthropic)
Data & Databases : PostgreSQL, MySQL, Prisma, Supabase, multi-tenant architecture (RLS)
Data Science & ML : EDA, Data Cleaning, Feature Engineering, Predictive Modeling, Regression, Classification
Libraries & BI : Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Folium, Looker Studio
Integrations & DevOps : Midtrans Payment Gateway, Technical SEO, Docker, Vercel, Github, Railway
Soft Skills: Data Storytelling, Product Thinking, Presentation, Public Speaking, Cross-functional Collaboration

WORK EXPERIENCES

Bisasinema **Tangerang, Indonesia**
Tech Lead & Assistant Product Manager | React, Tailwind, Express.js, Midtrans, SEO *Mar 2026 – Present*

- Led the end-to-end build of Bisasinema's first full company-profile and product platform, establishing the digital presence of a film media & education brand from scratch.
- Designed and shipped a Coursera-style learning platform powering the Filmmaking Lab (1-week offline course) and Masterclass digital-ticketing products — from registration to checkout.
- Integrated the Midtrans payment gateway for live, secure transactions; the Learning Lab launch generated Rp20M+ in early ticket sales.
- Built an internal monitoring dashboard giving the team real-time visibility into payments and sales trends, replacing manual tracking.
- Owned full technical SEO, taking Bisasinema to top search visibility for its core keywords and driving organic discovery and branding.

PT Anugrah Kopi Nusantara (Ankop) **Bandung, Indonesia**
Full-Stack Software Engineer | Next.js, NestJS, MySQL, Prisma, Docker, Railway, Vercel *Jun 2026 – Present*

- Built Ankop Trace, an offline-first coffee operations system that took a specialty coffee producer fully off paper, digitizing the entire pipeline from cherry intake to fermentation, drying, hulling, sorting, warehouse, payment, and owner reporting.
- Tracked 5,000+ kg of coffee cherry across multiple batches and 15+ active suppliers, surfacing a live ~80% acceptance rate with automated weight movement logs that replaced manual Excel.
- Digitized tens of millions of rupiah in settled supplier payments, auto-computed from accepted kg plus approval, giving the owner real-time visibility with zero manual reports.
- Engineered offline-first data capture: at the factory where signal drops, field inputs queue locally and auto-sync the moment connection returns, so no weighing is ever lost.
- Designed a Workforce Scheduling and Anti-Fraud Attendance module with a full audit trail..

Bank Sampah Digital **Serang, Indonesia (Virtual Internship)**
Data Scientist Intern | Python, Looker Studio, Data Storytelling *Jan 2026 – Mar 2026*

- Built CEO-facing monitoring dashboards that turn sustainability and operations data into clear, decision-ready visuals for fast leadership review.
- Translated digital-transformation business problems into measurable analytical objectives.
- Prepared reliable datasets through exploration, cleaning, anomaly handling, and feature engineering; delivered final reports refined through stakeholder feedback.

PT Anugrah Energi Indonesia **Tangerang, Indonesia (SMK Internship)**
Frontend Developer | React, Tailwind CSS *Jun 2023 – Oct 2023*

- As a vocational-school intern, helped a small company build responsive, scalable web interfaces with React and Tailwind CSS in a production environment.
- Applied component-based architecture and utility-first styling to improve UI consistency and development speed.

PROJECTS

Tera — Multi-Tenant SaaS for Specialty-Coffee Export Operations | Next.js 14, FastAPI, PostgreSQL 16, Supabase

- Built a production-ready SaaS platform with self-serve signup, automated tenant provisioning, and 6 role-gated dashboards (admin, field officer, procurement, CEO, viewer, Q-grader).Translated analytical findings into interactive dashboards for business stakeholders.

- Engineered three-layer access control — frontend route guards + API role enforcement + PostgreSQL Row-Level Security — for full multi-tenant data isolation.
- Implemented a transparent rule-based pricing engine (weigh → price → WhatsApp) and a harvest-to-buyer traceability timeline.

Kuali — AI Operations Assistant for WhatsApp-First Culinary MSMEs | Next.js, Supabase, LLM
- Led a hackathon team building an AI assistant that converts messy WhatsApp order chats into structured orders, payment reminders, ingredient/production planning, and daily recaps.
- Designed the LLM parsing pipeline (chat → structured JSON) and the overall product architecture.

Proactive Cancellation Management | Python, Looker Studio, Google Colab, Figma
- Analyzed hotel booking and cancellation patterns to identify key drivers of revenue loss.
- Translated findings into interactive dashboards and data-driven recommendations; recognized for strong storytelling and analytical depth

LEADERSHIP & ORGANIZATION

UMN ECO **Tangerang, Indonesia**
Coordinator of Website Division *Jan 2026 - Present*
- Led development and maintenance of the organization's website aligned with sustainability and health awareness goals.
- Initiated a data-driven feature concept to visualize daily waste impact (e.g., plastic usage) for public education.

Duta Anti Narkoba UMN **Tangerang, Indonesia**
Coordinator of Website Division *Dec 2024 – Nov 2025*
- Managed end-to-end website delivery including organizational profiles, event schedules, and ticketing features.
- Coordinated team collaboration using GitHub and guided members in React and Tailwind CSS practices.

STARLIGHT **Tangerang, Indonesia**
Website Division Member *Oct 2024 – Nov 2025*
- Developed and styled interactive division pages focusing on usability and responsive design.
- Built the Mini Gerda onboarding page to streamline member registration and integration.

AI Community **Tangerang, Indonesia**
Volunteer *Mar 2025 – Mei 2025*
- Delivered AI demonstrations and hands-on sessions during Open House events for students and parents.
- Supported workshops by explaining AI concepts through practical and interactive examples.

ACHIEVEMENTS

1st Place, National — I/O Festival
Built a B2B platform for the circular economy
3rd Place, National — SurabayaDev Developer Battle 2025
National data analysis competition focused on hotel booking and cancellation patterns.
2nd Place, Internal — CIMB Niaga Pitching Day (UMN)
Developed a functional mobile app for digital account opening using React Native and Expo Go.

CERTIFICATIONS

Associate Data Scientist (Competent) — BNSP, Jan 2026
Data Science Bootcamp (Excellent Graduate) — Digital Skola, Nov 2025
Data Science Capstone Project : Predicting Bicycle Rental — University of London (Coursera), Jan 2025
Exploratory Data Analysis for Machine Learning — IBM (Coursera), Jan 2026
Supervised Machine Learning: Regression - IBM (Coursera), Jan 2026
Python for Data Science, AI & Development — IBM (Coursera), Jan 2025
