EDUCATION

Universitas Multimedia Nusantara, B.Sc. in Informatics, GPA : 3.51 *Aug 2024 – Present*
SMKN 4 Kota Tangerang, Software Engineering *Jun 2021 – Jul 2024*
Digital Skola, Data Science Bootcamp (Excellent Graduate) *Jun 2025 – Oct 2025*

TECHNICAL SKILLS

Languages : Python, SQL (MySQL, PostgreSQL), JavaScript, TypeScript
Frontend : React, Next.js, Tailwind CSS, React Native (basic)
Backend & APIs : FastAPI, NestJS, Node.js, Express.js, REST, LLM/AI API integration (OpenAI, Anthropic)
Data & Databases : PostgreSQL, MySQL, Prisma, Supabase, multi-tenant architecture (RLS)
Data Science & ML : EDA, Data Cleaning, Feature Engineering, Predictive Modeling, Regression, Classification
Integrations & DevOps : Midtrans Payment Gateway, WhatsApp Cloud API, Technical SEO, Docker, Vercel, Github, Railway
Soft Skills: Data Storytelling, Product Thinking, Presentation, Public Speaking

WORK EXPERIENCES

Macacih, Skystar Ventures **Tangerang, Indonesia**
Full-Stack Software Engineer | Next.js, Prisma, PostgreSQL, Midtrans, PWA *Sep 2026 – Present*

- Built a web ordering system where customers order drinks online, track the order live, and pick it up at a campus booth or electric cart.
- Built workshop ticketing with seat selection, a seat layout editor, digital tickets, and QR codes for check in at the door.
- Launched a prepaid membership and loyalty program where customers collect points from every sales channel.
- Created an owner dashboard that shows revenue, stock, and margin per channel and per event, updated in real time.
- Integrated Midtrans so customers can pay online for drinks, workshops, and memberships.

Bisasinema **Tangerang, Indonesia**
Tech Lead | React, Tailwind, MySQL, Nest.js, Midtrans, SEO, R2 Cloudflare, Vercel, Railway *Dec 2025 – Oct 2026*

- Built one platform that runs four product lines for a film education brand: company profile, online course LMS, offline Masterclass ticketing, and digital templates.
- Built a Coursera style learning platform for Filmmaking Lab, a one week offline course, and Masterclass tickets, covering everything from registration to checkout.
- Set up two payment gateways with promo codes, early bird pricing, and group pricing. The Learning Lab launch alone brought in Rp30M+ in early ticket sales.
- Delivered a revenue dashboard so the team can see members, transactions, and income per product without manual reports.
- Handled the technical SEO, which brought the brand to the top of search results and drove organic sign ups.

CV Anugrah Kopi Nusantara **Bandung, Indonesia**
Full-Stack Software Engineer | Next.js, NestJS, MySQL, Prisma, Docker, Railway, Vercel *Jun 2026 – Present*

- Replaced paper records and Excel reports with one live system covering all 9 steps, from coffee cherry intake to warehouse and farmer payment.
- Tracked 5,000+ kg of coffee cherry from 15+ suppliers with automatic weight logs, showing a live acceptance rate of about 80%.
- Automated supplier payments worth tens of millions of rupiah, calculated from accepted weight and owner approval, with no manual reports.
- Made data entry work offline, so weighing records are saved on the device when signal drops at the factory and sync once it comes back.

Bank Sampah Digital **Serang, Indonesia (Virtual Internship)**
Data Scientist Intern | Python, Looker Studio, Data Storytelling *Jan 2026 – Mar 2026*

- Built monitoring dashboards for the CEO that turn sustainability and operations data into clear visuals for quick decisions.
- Turned digital transformation problems into clear and measurable analysis goals.
- Cleaned and prepared datasets through exploration, anomaly handling, and feature engineering, then refined the final reports based on stakeholder feedback.

PT Anugrah Energi Indonesia **Tangerang, Indonesia**
Full-Stack Software Engineer | Next.js, PostgreSQL, PWA, Railway *Nov 2026 – Present*

- Leading the build of one system for a boiler contractor that covers the company website, field reports, billing, cost control, and tax recaps, with access set for 8 roles.
- Rebuilding the company website after the old one was hacked, adding a quote request form and SEO so new clients can find the company on Google.
- Designing an offline field app where technicians send daily reports even from plant areas where phones are not allowed, turning them into progress charts for the directors.
- Building a billing system that tracks down payments, retention, and taxes for every project milestone, so each invoice goes out complete and on time.

PROJECTS

Weigh to Go: WhatsApp Purchasing Planner for Caterers | Next.js, Supabase, WhatsApp API, Midtrans

- Built a SaaS where catering owners sign up from a WhatsApp ad, set up their kitchen in 10 minutes, and send daily headcounts by chat to get next week's shopping list in rupiah.
- Built the purchase calculation engine on institutional food service formulas (SPMI), with exact integer math, rounding to pack sizes, and 25 test cases written before coding.
- Designed a 21 day trial that compares planned and actual purchases every week and sends the owner a simple weekly report, with each kitchen's data kept separate using PostgreSQL RLS.

Muara: Multi Marketplace Revenue & Tax Tracker for Online Sellers | Next.js 15, Prisma, Claude API, WhatsApp API

- Building a SaaS that combines sales reports from Shopee, Tokopedia, TikTok Shop, and Lazada into one revenue number, so sellers know where they stand against the Rp500M tax threshold.
- Built report parsers that recognize each file format and stop when they find an unknown one, instead of showing a wrong number.
- Used an LLM only to map unfamiliar report columns, sending masked samples so customer data never leaves the system, and a person approves every mapping first.

LEADERSHIP & ORGANIZATION

UMN ECO **Tangerang, Indonesia**
Coordinator of Website Division *Jan 2026 – Present*

- Led the development and upkeep of the organization's website on sustainability and health awareness.
- Proposed a feature that shows daily waste impact, such as plastic use, to educate the public.

Duta Anti Narkoba UMN **Tangerang, Indonesia**
Coordinator of Website Division *Dec 2024 – Nov 2025*

- Delivered the full website, including organization profiles, event schedules, and ticketing.
- Coordinated the team on GitHub and mentored members in React and Tailwind CSS.

STARLIGHT UMN **Tangerang, Indonesia**
Website Division Member *Oct 2024 – Nov 2025*

- Built responsive division pages that are easy to use on any device.
- Built the Mini Gerda onboarding page to make member registration simpler.

ACHIEVEMENTS

1st Place, I/O Festival Web Development (National)
Led the team that built PulangKeMerek, a B2B platform that helps FMCG brands meet their Extended Producer Responsibility (EPR) duties. It is now being prepared for a patent.
4th Place Finalist, IFEST 2026 Hackathon (National)
Built Lembar Janji in 24 hours, a web tool that shows migrant workers what a job offer promises and what it leaves out, before they pay anything.
3rd Place, SurabayaDev Developer Battle 2025 (National)
Analyzed hotel booking and cancellation patterns in a national data analysis competition.
2nd Place, CIMB Niaga Pitching Day (Internal)
Built a working mobile app for opening a bank account digitally, using React Native and Expo Go.

CERTIFICATIONS

Associate Data Scientist (Competent), BNSP, Jan 2026
Data Science Bootcamp (Excellent Graduate), Digital Skola, Nov 2025
Data Science Capstone Project : Predicting Bicycle Rental, University of London (Coursera), Jan 2025
Exploratory Data Analysis for Machine Learning, IBM (Coursera), Jan 2026
Supervised Machine Learning: Regression, IBM (Coursera), Jan 2026
Python for Data Science, AI & Development, IBM (Coursera), Jan 2025
